BACH - SHOSTAKOVICH - MADSEN ... ?

It would not be too far-fetched to suggest that Trygve Madsen's cycle of twenty-four preludes and fugues is the most extensive Norwegian piano work to date.

"24 Preludes and Fugues" by Trygve Madsen
New release on 2L with Jens Harald Bratlie, piano, January 20th 2006

"A substantial work offering considerable musical revenue," says pianist Jens Harald Bratlie who has recorded Madsen's music on this CD. "It is full of excellent themes and motifs so well moulded together that they immediately give musical meaning full of life and character. Despite the total lack of performance instructions the music is clearly shaped, offering many opportunities for variation."

How might one sum up Trygve Madsen's oeuvre? Horn player Frode Ras Wakens, who has worked with the composer for almost thirty years, puts it like this: "Trygve Madsen's music is friendly, full of humour, beautiful, elegant, and capable of establishing a direct link to the listener's heart."

Trygve Madsen stands on the shoulders of two giants whom he honours in more or less obvious ways: Bach's and Shostakovich's extended cycles provided the fundament for Trygve's own "Mount Everest" dream: to compose a collection of preludes and fugues in every key. To realise such a dream Realizing such a project makes many demands on the composer, years of experience in composing for one - a "black belt" in fugue writing is certainly necessary before embarking on a journey in the footsteps of the masters! Then one must have time and peace and quiet - luxury commodities which would otherwise be spent on more commercial ventures, earning one's keep.

Thus Bach's and Shostakovich's extensive cycles provided the fundament for Trygve's own "Mount Everest" dream: to compose a collection of preludes and fugues in every key. To realise such a dream Realizing such a project makes many demands on the composer, years of experience in composing for one - a "black belt" in fugue writing is certainly necessary before embarking on a journey in the footsteps of the masters! Then one must have time and peace and quiet - luxury commodities which would otherwise be spent on more commercial ventures, earning one's keep.

At the same time Trygve also began lessons in counterpoint and composition with Egil Hovland. Hovland started off by setting exercises in polyphonic writing; thus Trygve's piano and theory lessons complemented each other in the best possible way. A daring thought crossed the aspiring composer's mind: Why not

Thus Bach's and Shostakovich's extensive cycles provided the fundament for Trygve's own "Mount Everest" dream: to compose a collection of preludes and fugues in every key. Then one must have time and peace and quiet - luxury commodities which would otherwise be spent on more commercial ventures, earning one's keep.

A comparison of Shostakovich's and Madsen's C major preludes illustrates the difference: both pieces are sarabandes, composed in baroque style. Madsen, however, introduces a syncopation in the second bar which immediately gives the music a jazz feel. Madsen's prelude is just as much a jazz ballad, evoking the combined spirits of J.S. Bach and Oscar Peterson. The jazz influence is particularly audible in the B flat major prelude (no. 23); this is pure jazz! Latin-American rhythms can be heard in the G major prelude (no. 17) which is in the form of a habanera or a tango, depending on the performer's choice of tempo.

An important aspect.

Trygve Madsen did not have the opportunity to embark on the full cycle until 1995 - here begins the short story. Armed with forty years' experience, a pencil, manuscript paper, coffee - and cigarettes - he completed the entire cycle of twenty-four preludes and fugues by the end of January 1996.

"What is new in Trygve Madsen's work compared with Shostakovich's? Apart from the indefinable element of musical personality Madsen's music is influenced by twentieth century jazz as much as it is by Bach.

And, in a final symbolic tribute, Madsen's last fugue - and thereby the entire work - ends with this theme.

A companion of Shostakovich's and Madsen's C major preludes illustrates the difference: both pieces are sarabandes, composed in baroque style. Madsen, however, introduces a syncopation in the second bar which immediately gives the music a jazz feel. Madsen's prelude is just as much a jazz ballad, evoking the combined spirits of J.S. Latin-American rhythms can be heard in the G major prelude (no. 17) which is in the form of a habanera or a tango, depending on the performer's choice of tempo.

In Shostakovich's work there are tempo indications and dynamic markings. Madsen, however, has deliberately omitted such instructions, leaving the choice of tempo and dynamics to the performer. In this he follows Bach's example - and perhaps that of the jazz tradition, too, in which the performer's freedom of choice is an important aspect.
